Non-profit 501 (c) (3) organization

Patients Helping Patients
Patients partnering with scientists to make progress against lymphoma

Board of Directors
Mike Abrams
Jama Beasley
Linda Gerstley, PhD.
Carol Lee
Dennis McComb

Scientific Advisors
Maurizio, Bendandi, PhD, MD
Dr. Jeff Sharmann, M.D.
Susan B. Spector,
MS, RD, CDN
Susan Olender, M.D.
John Densmore, MD, Ph.D.
Andrew Croaker, MD
Maurizio, Bendandi, PhD, MD
Alberto Mussetti, MD
Lynda Olender, R.N.
Dimitri Placantonakis, MD, Ph.D.
Allen Cohen, MD, Ph.D.
Lurdes Queimado, MD, Ph.D.

Patient Navigators /Advisors
Susan Krivacic
Mike Lubrecht

Public Policy Advisors
Toby Holinder, Esq.

About Patients Against Lymphoma

Founded in 2002
by patients for patients

- Helping patients to become informed partners in their care by providing education, decision tools, and checklists on how to optimize doctor consults.
- Linking patients to evidence-based Best Practice Guidelines on the different types of lymphoma.
- Increasing awareness and understanding of investigational therapies and the importance of clinical research.
- Providing tools to find trials based on ones treatment status, the type of drug, and trials of interest.
- Helping patients to locate lymphoma experts and specialty centers -- encouraging expert second opinions.

Recognizing that only trained medical professionals with DIRECT contact with the patient should provide medical advice.

- Providing, safe, patient-friendly support forums:

www.Lymphomation.org

Online support forums

Our information and support venues are available 24 hours.
We require no fees, subscriptions, or registration, and we ask for no identifying information.

Day or night, and without leaving home, patients can find answers in total privacy, without concern about asking a “dumb” question.

We are experienced patient navigators, guided by our scientific advisors.

Our focus is on providing science-and EVIDENCE-BASED information in response to patient and caregiver questions.

Newly diagnosed patients are vulnerable to misinformation and false claims. We help patients to critically evaluate claims. Reminding that being open-minded includes being skeptical about opinion and testimonials.

Helping patients to think more like scientists

PROVIDING A COMPREHENSIVE RANGE OF TOPICS

Our topics are determined by patient and caregiver questions.

Ranging from Financial help to Finding trials for lymphoma based on the type of lymphoma, our treatment status, type of agent, and more

Providing Topic Searches to help visitors easily locate additional information on a given subject, from the most credible sources.

Providing an Ask a Question Service, often responding to visitor and support forum questions in real time.

Helping patients to find expert oncologists and research centers by region of the country

And much more

RESEARCH ADVOCACY

We remind scientists that patients are the primary stakeholders in clinical research — that we suffer the most when trials do not achieve full enrollment, which is a common and tragic event.

We engage scientists, investigators, the FDA, the Cooperative groups, CMS etc, depending on the issue — providing patient perspectives on:

Ethical design of clinical trials

Obstacles to enrollment in clinical trials, such as eligibility criteria, or the appeal of the study protocol as a therapeutic decision.

Helping scientists to think more like patients

Our FINANCIAL INDEPENDENCE is of vital importance ... so that our content and perspectives cannot be perceived as influenced by any financial conflict of interest.

Our sole purpose is to represent the interests of patients, present and future - reminding that we are all future patients.

Advancing the routine and informed consideration of clinical trials

Supporting clinical research that is good science -- answering important clinical questions -- and good medicine -- appropriate to the participants as a treatment decision

Thank you for your support!

Yours truly,

Karl Schwartz
